- JQuery, AJAX
- HTML
- Angular
- React
- Bootstrap
- CSS and Sass
- UI /UX

Backend

- Java, Maven
- Node, NPM
- Spring Boot
- Express
- PHP
- MySQL
- MongoDB
- MVC

Software

- IntelliJ IDEA
- WebStorm
- VS Code
- Figma
- Photoshop
- Microsoft 365

Languages

English B1

Palacios Tarrillo Christian

I am a full-stack web developer with more than two years of experience developing websites and web applications. I have a deep understanding of web technologies, as well as web application architecture and design. Specialized in **Java, Spring Boot, Node, Express, GIT, MySQL, MongoDB, Angular, React** and many more. I have a continuous learning mindset and am always looking for new ways to improve my skills. I am looking for a company where I can show my potential.

Projects

Developer Full Stack - 2022

Express Game Controller

I created and designed a web application REST API that was in charge of managing clients, products and invoices. It implements a CRUD system, REST API, JPA, Spring Security OAuth2, JWT. Developing Frontend and Backend, Spring Boot, Angular, functional programming and MySQL.

Developer Backend Spring Boot - 2021

Express Game

The project was deployed within the same server and implemented the Spring Boot, Thymeleaf, JPA, Security, JWT, JQUERY, JS, HTML and CSS frameworks. The program was in charge of managing clients, products, categories, invoices, authentication to limit access to the pages and a CRUD system was implemented in all of them.

Developer Full Stack MEAN - 2022

Bienes Raices

The project uses the MEAN stack (MongoDB, Express, Angular and Node) and implements JWT authentication to add and control the data entered by clients both for the correct entry or registration of data.

Developer Full Stack -2020

GDL WEBCAMP

The project implemented CRUD, MVC, PHP, JS, HTML, CSS, MySQL and a PayPal payment gateway. I created and designed the web application from start to finish, the project was in charge of managing the ticket sales and a system in charge of managing all the processes, it is a big and beautiful project. Everything is displayed in a customer friendly way.

Developer Full Stack - 2022

Shopex

The REST API project that handles a CRUD of products and has an online chat that implements JWT for authentication and Socket.io for two-way communication with the client. Developed with Google Auth, Node, Express, MongoDB, HTML, CSS, JS and functional programming.

Education

Systems Engineering, 5 cycle 2020-03 - Now
Universidad Autónoma del Perú, Lima
